<Paper Title>

<Authours>

1   Problem context

What exist in the current relevant literature or industrial context that motivates the authors.?

2   Problem description

Within the context, what is the problem that the paper attempts to address?

Why is the problem important?

What are the sub-problems that the problem entails? Briefly describe each sub-problem.

3   Proposal

Brìefly summarises the proposed solution, making clear each of the contribution.

1   Contribution 1

Brief description of contribution 1.

2   Contribution 2

Brief description of contribution 2.

3   …

4   Advanced Driver Assistance Systems (ADAS)

Brìefly summarises any ADAS-related contributions in the paper.

4   Method

What approach(es) or method(s) does the paper use to tackle the problem?

5   Results & Evaluation

What are the results? Briefly summarise the evaluation results?

What specific example(s) does the paper use to illustrate the results?

How were the results evaluated?

What are threats to validity?

1   Advanced Driver Assistance Systems (ADAS)

Summarises any ADAS-related results presented in the paper.

1   ADAS functionalities

Discuss briefly if any results explicitly address ADAS functionalities.

2   Quality attributes or constraints

Discuss briefly if any results explicitly address quality attributes or constraints.

3   Architectural models

Discuss briefly if any results explicitly address architectural models.

6   Limitations

What are the limitations of the paper?

What is the plan for future works?
